INDEX TO THE MAPS OF SCOTLAND,

ON THE SCALES OF
25.344 AND SIX-INCHES TO ONE MILE.

PREFACE.

The Index is drawn on the scale of Four Miles to One Inch, and is arranged by counties, or by groups of counties when on the same meridian. Thus, to start from the North of Scotland, Zetland and Orkney, Caithness, and Sutherland, are projected on different meridians and they are accordingly arranged separately in the Index. Aberdeenshire, Banffshire, and Kincardineshire, on the other hand, are projected on the same meridian, and they are all on one continuous Index, their sheet lines being all continuous and parallel to one another. The other counties are arranged on the same principle according to whether they are on the same or on different meridians. The number of each 6-inch sheet is shown in its centre. Parts of certain counties are still published on the 6-inch scale in full sheets, but in most cases this map is now published in quarter sheets, and, where so published, the description N.W., N.E., S.W., S.E., is printed in the centre of each quarter sheet. If the quarter sheet has no letters (N.W., &c.) on it, it may be inferred that the quarter sheet lies entirely outside the county, and will be found on the Index of the adjoining county. Every $\frac{1}{25344}$ plan has its number in the centre of it, and where there is no number, there is no $\frac{1}{25344}$ plan of that area. Thus in the diagram the number of the 6-inch sheet is 36, but only 3 quarter sheets are published, viz.:—N.W., N.E., and S.W. The S.E. portion is not published because there is no part of it in the county in question.

| | | | |
|------|----|------|---|
| 1 | 2 | 3 | 4 |
| N.W. | N. | N.E. | |
| 5 | 6 | 7 | |
| 36 | | | |
| 9 | 10 | | |
| S.W. | | | |
| 13 | 14 | | |

Similarly, there are the following $\frac{1}{25344}$ plans, forming part of 6-inch sheet 36, and described as 36. 1, 36. 2, &c. It is known that there is no 36. 8, as there is no plan number in it. It has not been published on the $\frac{1}{25344}$ scale either because it is moorland or uncultivated district, or because no part of it falls in the county in question.

In the case of adjoining counties on the same meridian, the 6-inch sheets and $\frac{1}{25344}$ plans crossed by a county boundary bear the numerals of both counties, thus:—20 S.W. Banffshire and 16 S.W. Aberdeenshire are one and the same quarter sheet, partly filled up with Banff and partly with Aberdeen. Similarly the $\frac{1}{25344}$ plan 25. 8, Banff covers exactly the same area of ground as 24. 8, Aberdeenshire and is composed of parts of both counties.

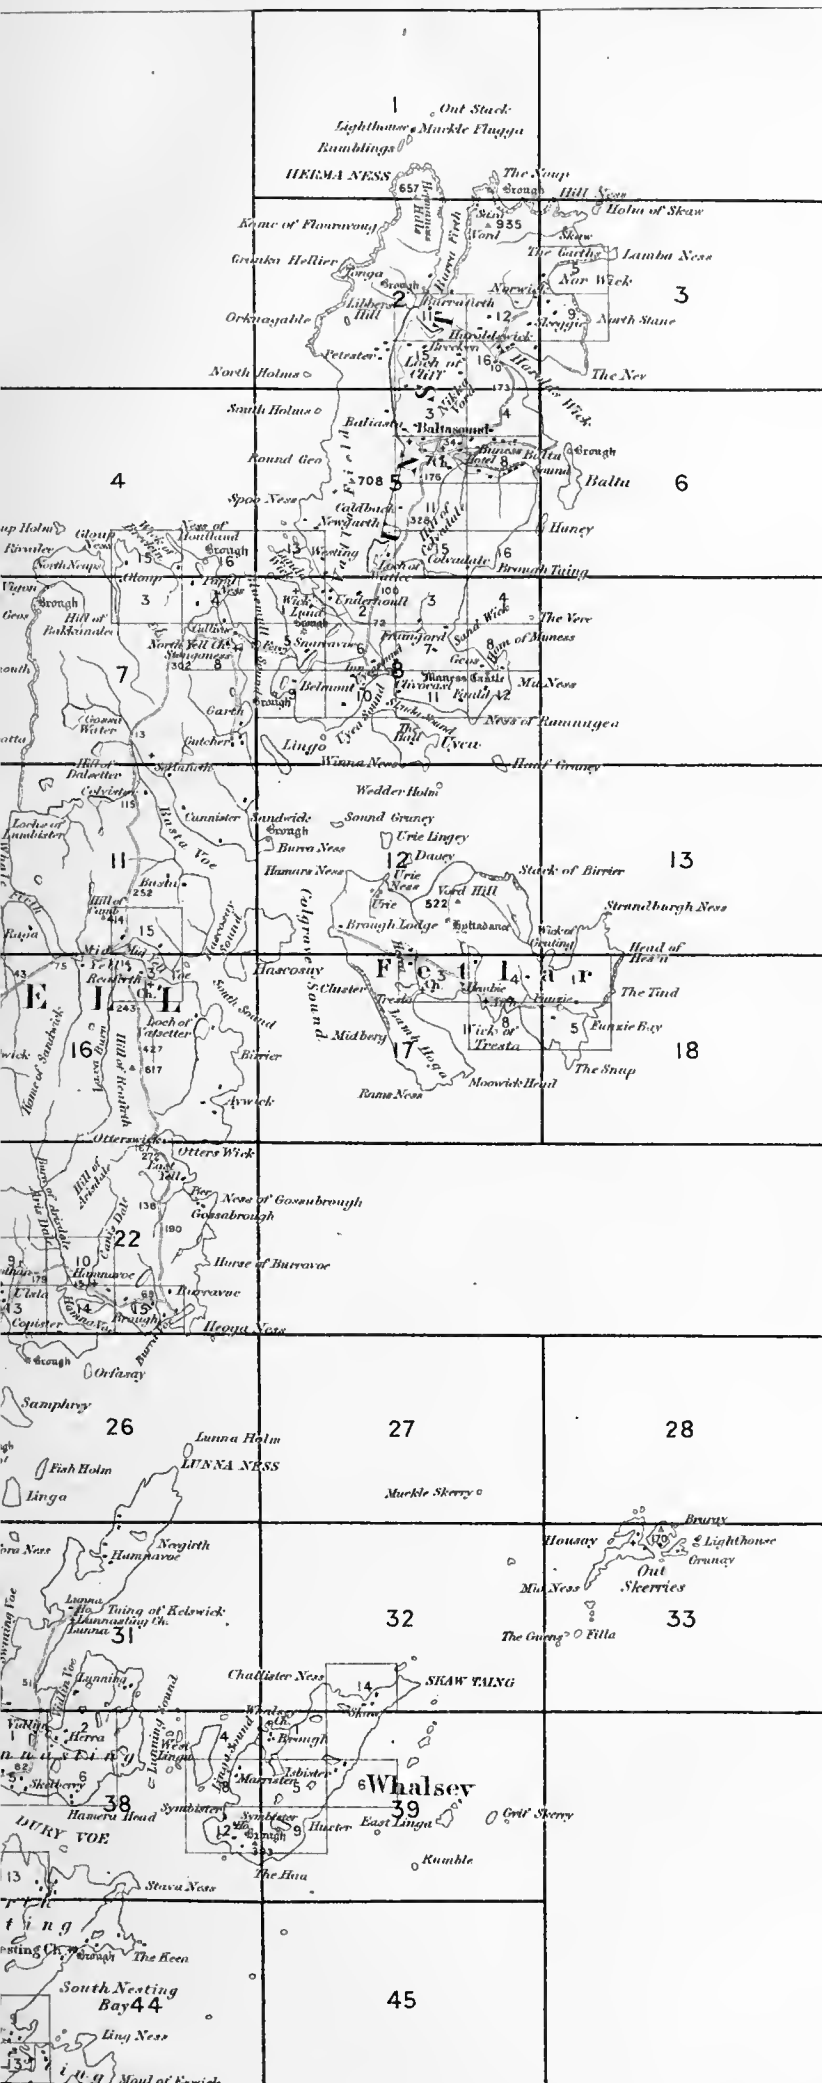

In ordering Maps, however, it is better, though not essential, that the numerals used should, as far as possible, be those of the county in which the required area is situated.

CONTENTS.

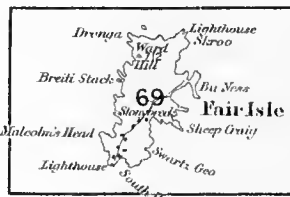

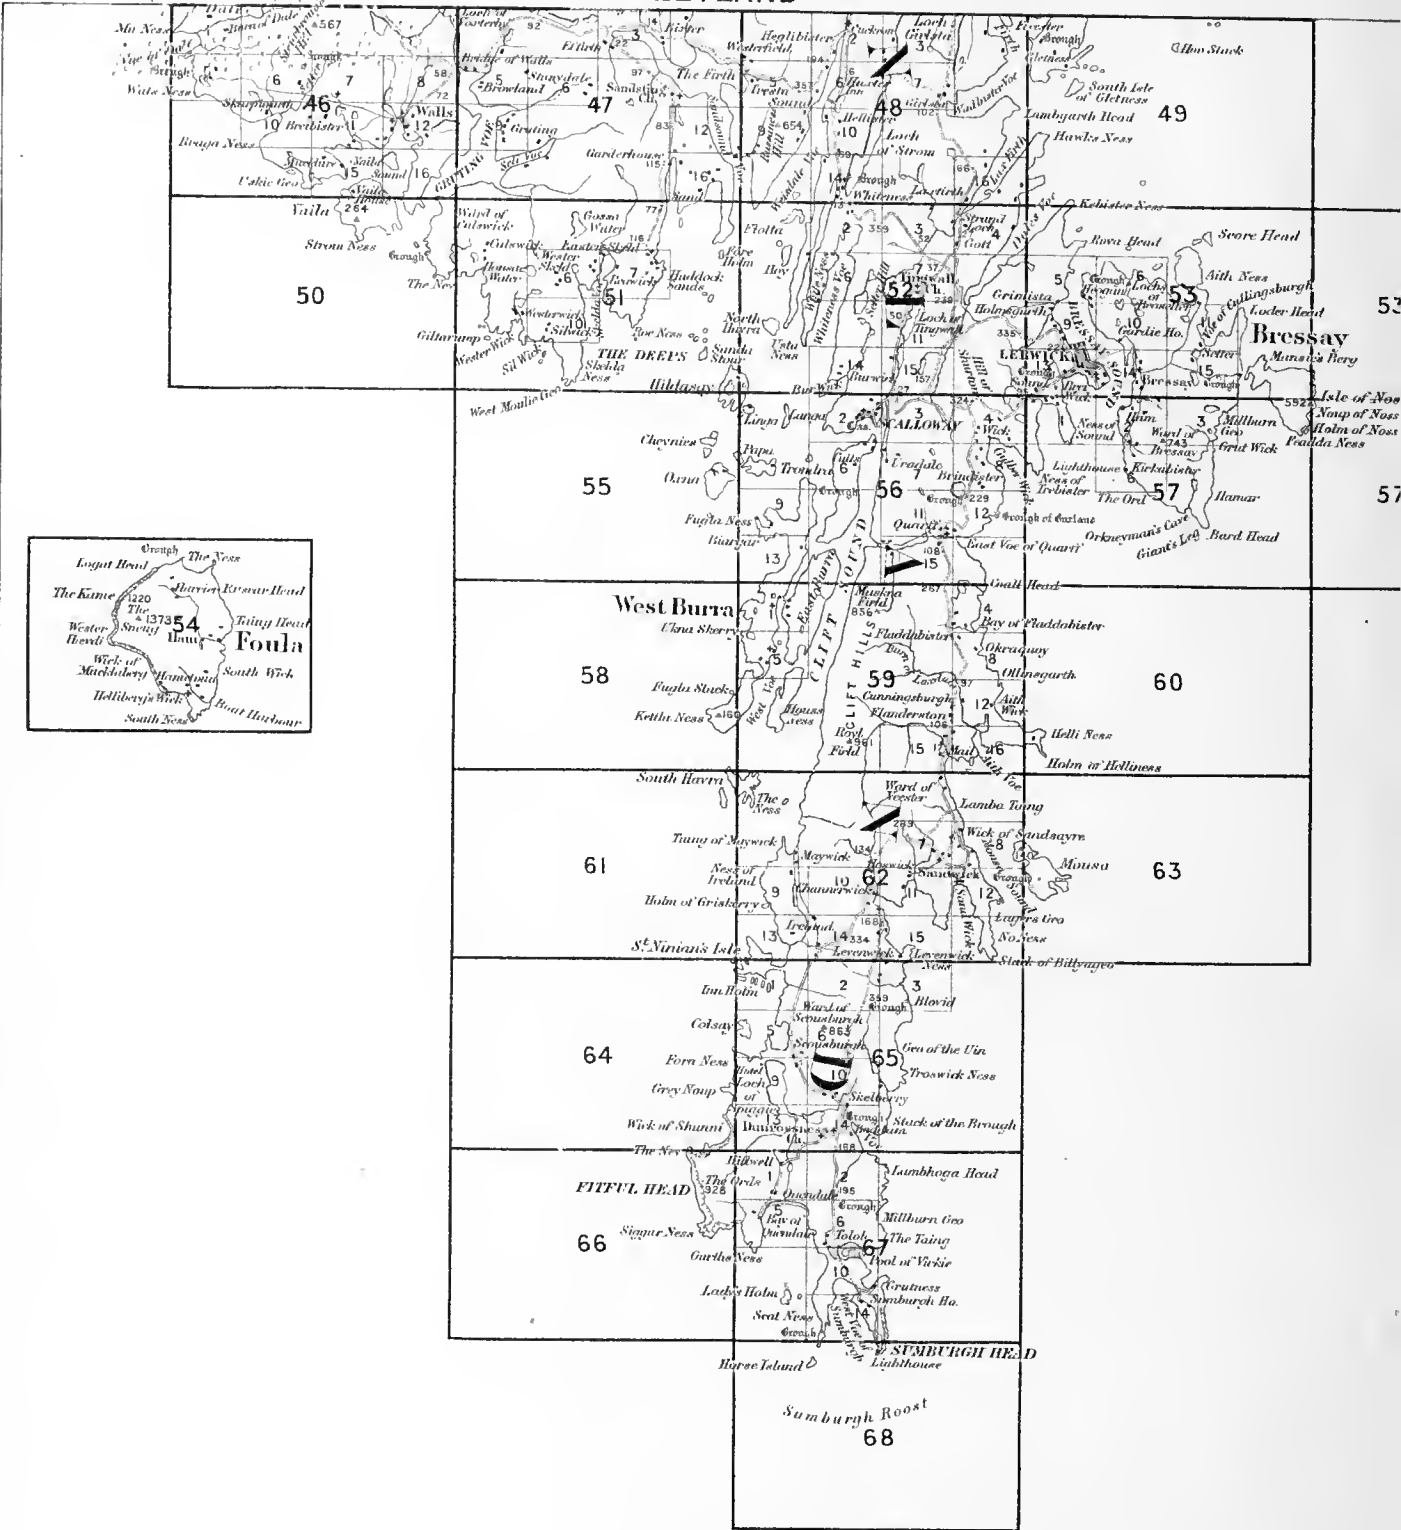

| Counties. | Pages of Indexes. | Counties. | Pages of Indexes. | Counties | Pages of Indexes. |
|-------------------|-------------------|-------------------|-------------------|-----------------|-------------------|
| Aberdeenshire - | 32 to 36 | Fifeshire - | 56, 57 | Orkney - | 5, 6, 7 |
| Argyllshire - | 44 to 52 | Forfarshire - | 38, 39 | Peeblesshire - | 63 |
| Ayrshire - | 64 to 67 | Haddingtonshire | 58 | Perthshire - | 40 to 44 |
| Banffshire - | 32, 33, 34, 36 | Inverness-shire - | 25 to 31 | Renfrewshire - | 62 |
| Berwickshire - | 74, 75 | „ I. of Skye | 23, 24, 25, | Ross & Cromarty | 12 to 16 |
| Buteshire - | 50, 51 | „ Hebrides { | 18, 20, 21, | „ (I. of Lewis) | 18, 19, 21 |
| Caithness-shire - | 8 | „ | 22 | Roxburghshire - | 72, 73 |
| Clackmannanshire | 43 | Kincardineshire | 34, 35 | Selkirkshire - | 69 |
